Plant The Best Fruit Trees

Plant The Best Fruit Trees

The importance of obtaining the best nursery stock cannot be over emphasized. It is the healthiest and most vigorous nursery tree that always makes the most profitable orchard tree. Growers do not give enough consideration to the matter of planting stocky, healthy, vigorous trees. Many growers make the fatal mistake of planting trees purchased from an unreliable source, only to reap disappointment in the end. It is false economy to plant inferior or low-grade fruit trees just because they are cheap. Investigation has shown that growthy, vigorous, well matured trees withstand transplanting better, resist insects and disease better, come into bearing earlier, and develop into more profitable orchard, than small, stunted and less vigorous trees. The best trees which can be secured, will in the end, be the most economical and profitable.

Our aim is to grow the best trees that scientific skill can produce. Our stock is propagated from our own commercial orchard, which have a record for heavy bearing of high quality fruit. Many new varieties and color strains have been introduced in the last few years. We have all the new color strains and new varieties that have been thoroughly tested and proven of value in this region. We do not recommend the extensive planting of new varieties until they have been thoroughly tested and their commercial value assured. It is our aim to satisfy every customer and we solicit your patronage with the assurance that we can furnish you trees of the highest quality.

Asa Kelley, Owner and Manager

TERMS—Remittance must accompany order. We can send trees by mail by pruning away a portion of the tops to about five feet in order to meet postal requirements. Customers who make their purchases at the nursery, will be allowed a discount.

When ordering trees by Parcel Post add 10% for Postage.

APPLES

The apple is the most profitable of fruits. They bear heavy crops annually, and always sell at a good price. We grow the best varieties that are adapted to this country. The following list of apples have been tested and are found well adapted to this region. Our trees are vigorous, heavy bodied and propagated on vigorous, whole roots and if properly cared for, will bear at two and three years of age.

Price—One year, each, \$1.00; 10, \$9.00; 100, \$80.00

Two year, each, \$1.00; 10, \$9.00; 100, \$80.00

YELLOW TRANSPARENT—Earliest to ripen. Tart, excellent for cooking, the best very early apple, young and heavy bearer.

LIVELAND RASPBERRY—Large, red striped, sub-acid, tender and good cooker. Tree, large, vigorous grower, heavy bearer—one of the best summer varieties.

LODI—This apple is said to be an improvement over Yellow Transparent. Averaging larger and more resistant to blight. Ripening after Transparent. Young and heavy bearer.

POLLY EADES—A new yellow apple, well recommended, good grower, heavy bearer, (similar to Yellow Transparents), three weeks later.

RED JUNE—One of the best mid-season apples, large, bright red, very attractive, ripens over a long season, hardy and heavy bearer—a very desirable summer apple.

WILSON RED JUNE—A large brilliant deep red apple. Tree hardy. Very desirable for a late summer apple. Young and heavy bearer.

SUMMER CHAMPION—A large red striped, late summer apple. One of the best of its season, tree vigorous, young and heavy bearer, long ripening season.

GOLDEN SWEET (Old Fashioned Sweet Apple)—Large yellow sweet apple, an old time sweet apple that is still popular.

GRIMES GOLDEN—One of the most popular late fall varieties, large, yellow, good quality, fine for cooking—always in demand. Tree is good grower, young and heavy bearer.

ROME BEAUTY—Good late fall variety, excellent cooker, large highly colored. We have the dark red strain—tree, upright grower, young and heavy bearer.

DELICIOUS—We have the dark red strain, a popular, high quality variety, a good market variety, always sells for high price. Delicious quality; tree, vigorous grower, heavy bearer. We have gathered thirty (30) bushels per tree of this variety.

YELLOW DELICIOUS—A very attractive, high quality yellow apple that is being extensively planted—always sells at high prices. We have sold \$100.00 worth of apples per tree in one season, of this variety. A good market variety.

WINESAP—An old variety that is still popular, best late keeper. We have kept them until June in the cellar. Good quality, firm, bright red color. Tree, vigorous, spreading, bears heavy crops annually.

PARAGON (Black Twig)—Similar to Winesap, but larger, dark red, highly colored, late keeper, a very attractive apple. Tree, spreading, vigorous grower and good bearer.

STAYMAN—This is a very popular variety. Fruit is a dark red, large, highly colored, and of a fine quality, juicy, sub-acid, and very much in demand. We have the dark red strain.

KING DAVID—Late fall, dark red apple, very desirable for cooking and making apple butter, young and heavy bearer.

PLUMS

Price Each \$1.00

Abundance, tree large, productive, season early, round pinkish red flesh yellow, juicy and sweet, adapted to all soils.

BURBANK—Widely successful, fruit large dark red, flesh yellow with excellent flavor.

DAMSON—Tree good grower, hardy and productive fruit, purplish black tender juicy and firm.

PEACHES

Peaches are a very desirable fruit. They are always in demand for canning. People will pay almost any price for good peaches. This last season, peaches sold as high as \$10:00 per bushel. We have all the best varieties that are adapted to this country. Our trees are vigorous, heavy bodies, four to seven feet in size.

Price—Each, \$1.00; 10, \$9.00; 100, \$80.00.

Varieties

RED BIRD—Earliest, very firm, unlike many early peaches, this is excellent for cooking or canning. Highly colored, fine for market.

CARMAN—A semi-freestone, red blushed white peach; fine quality, ripens in early July, tree very hardy, early and heavy bearer.

CUMBERLAND—Very hardy early white freestone peach. Large beautiful red and white color. Excellent flavor. Young and heavy bearer. 20 days before Elberta.

HILEY—This is a very fine peach, very fine quality. White, with red blush, ripens after Carman, the best peach to follow Carman.

HALE HAVEN—A new peach that is highly recommended. Seeding of Hale and South Haven, with many of their good qualities.

GOLDEN JUBILEE—A large very early Freestone Peach. Profitable for home and local market. Ripe 25 days before Elberta. Fruit deep yellow large delicious, flavor excellent for canning.

EARLY ELBERTA—This is one of the most desirable peaches for canning, it has very high quality, large and attractive appearance, yellow with red blush.

ELBERTA—The old Elberta is still one of the best peaches for home and market. This and Early Elberta are the best for canning. Tree, large, vigorous grower and heavy bearer.

HALE—This is a firm freestone red blushed peach—colored weeks before ripe; excellent for sweet pickles; good keeper and good shipper.

HYSLOP CLING—This is the best white cling peach that is adapted to this country, better than old Heath Cling, does not rot, very firm and juicy. Good cling peaches are always in demand for preserves and pickles.

BELLE OF GEORGIA—One of the best white freestone peaches. Tree, large and vigorous, heavy bearer; fruit, large, high quality, attractive color.

LATE ELBERTA—A good late peach similar to Elberta, but a month later. Fruit, large, high quality; very desirable for late canning.

PEARS

Price—Each \$1.50; 10, \$10.00.

Pears are a very desirable fruit. They always sell at good prices and always in demand. The Keiffer and Garber can be profitably grown in Kentucky. They resist "blight" better than any other variety. Large, vigorous trees, and bear good crops annually.

Varieties:

GARBER—A very desirable pear ripening about the first of September. Large, round, yellow pear; juicy, high quality. This pear is more tender and juicy than Keiffer, and very resistant to blight.

KEIFFER—A large, high quality pear, ripening in October. A very firm pear and will keep until Christmas. When kept in cellar, will become juicy and tender. Tree is vigorous and heavy bearer, resists blight, one of the best late pears.

GRAPES

Price—Each, 50c.

The grape is one fruit that will bear every year. They are very desirable for canning and making juice, and are always in demand. In considering grapes, it is important to get varieties resistant to "Black rot."

Varieties:

CONCORD—Concord is the most resistant to rot of all grapes. More Concord are planted than all other varieties together. It bears heavy crops, large bunches, good keeper, and a most desirable grape.

LUTIE—The best early red grape, high quality, resists rot, desirable for home use.

LUCILE—A very good red grape, should be planted with Concord for pollination, large bunch, very attractive, and resistant to rot.

NIAGARA—The best white grape, large bunch, very attractive, should be sprayed for rot.

CHERRIES

Price—Each, \$1.50; 10, \$10.00

Varieties:

MONTMORENCY—This variety is the most profitable cherry to grow. It is large, dark red. Tree, hardy and abundant bearer.

EARLY RICHMOND—A few days earlier than Montmorency; dark red, abundant bearer, best early cherry.

STRAWBERRIES

Price—per 100, \$2.50

Strawberries are easy to grow, will grow in most any soil, and are well liked by everyone.

Varieties:

AROMA—A large, attractive variety, very firm, a most profitable strawberry to grow in this region.

BLAKEMORE—This is a new variety, very desirable, extensively planted in commercial growing.

RASPBERRIES

Price — Per Dozen, 60c; 100 \$4.00

Varieties:

CUMBERLAND—A large, black raspberry, very firm, high yielder, and the most desirable raspberry to plant.

SHADE TREES

Price—6 to 8 ft. size, \$2.00 Each

Varieties:

SUGAR MAPLE—A large, vigorous growing, healthy and long life, tree will live a hundred years, very desirable for shade.

WATER MAPLE—Large, rapid growing tree, very desirable for shade, adapted to moist soil.
